

Participate in survey about internal insulation in buildings

RIBuild would like to know about your experiences with internal insulation in buildings. What solutions do you use, and what challenges have you met in the process?

Your input will be used in the development of a new set of guidelines for moisture safe internal insulation. You also have the chance to give your ideas on features and content of the guidelines.

It will take you about 10-15 minutes to fill in the survey. You are welcome to forward the survey to you network.

[Begin the survey](#)

In order to create user-friendly guidelines RIBuild invites practitioners in the construction industry to participate in a survey about their experiences with internal insulation in buildings.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 637268
